## Freedom Of Creation launching creative Macedonia modular space divider

(High resolution images on request to: [foc-press@bt-media.net](mailto:foc-press@bt-media.net))

#1: floor-standing installation within a predefined frame

Amsterdam, November 2010 - The successful story of Freedom Of Creation's Macedonia pattern, developed by Janne Kyttanen and initially materialized in the form of an innovative tray or centerpiece, adds a new chapter and is now available to the public as a modular space divider.

Macedonia Space Divider is an intriguing and versatile way to characterize small or big environments thanks to the various possibilities of installation. A comfortable snap-lock system allows for quick and easy mounting of Macedonia's hexagon panels, which can be composed to cover any size of surface.

The modules, boasting an irregular, dynamic mesh pattern, can be floor-standing within a predefined frame, or have an open configuration in order to be hung from the ceiling, fixed to the wall, mounted between two layers of glass or even be composed to create multiple layer installations.

Macedonia Space Divider can assume any RAL color upon request, adding further creative freedom to the customer.

Macedonia Space Divider has first been installed in the new head office of Bijenkorf warehouses in Amsterdam in early 2010. The layout of Macedonia Space Dividers in these exclusive interiors has been conceived in collaboration with Qua Associates, interior designers of Bijenkorf offices.

## Specifications

**Measurements (1 panel):** 50 x 50 x 3 cm. From point to point (biggest diameter) the panel 50 cm. From the flat side to the other flat side is 43,4 cm.

**Material:** Glass filled propylene, or other, like PP/ABS, or transparent (polycarbonate).

**Color:** Available in virtually any RAL color

**Finish:** Easily cleanable matt surface finish

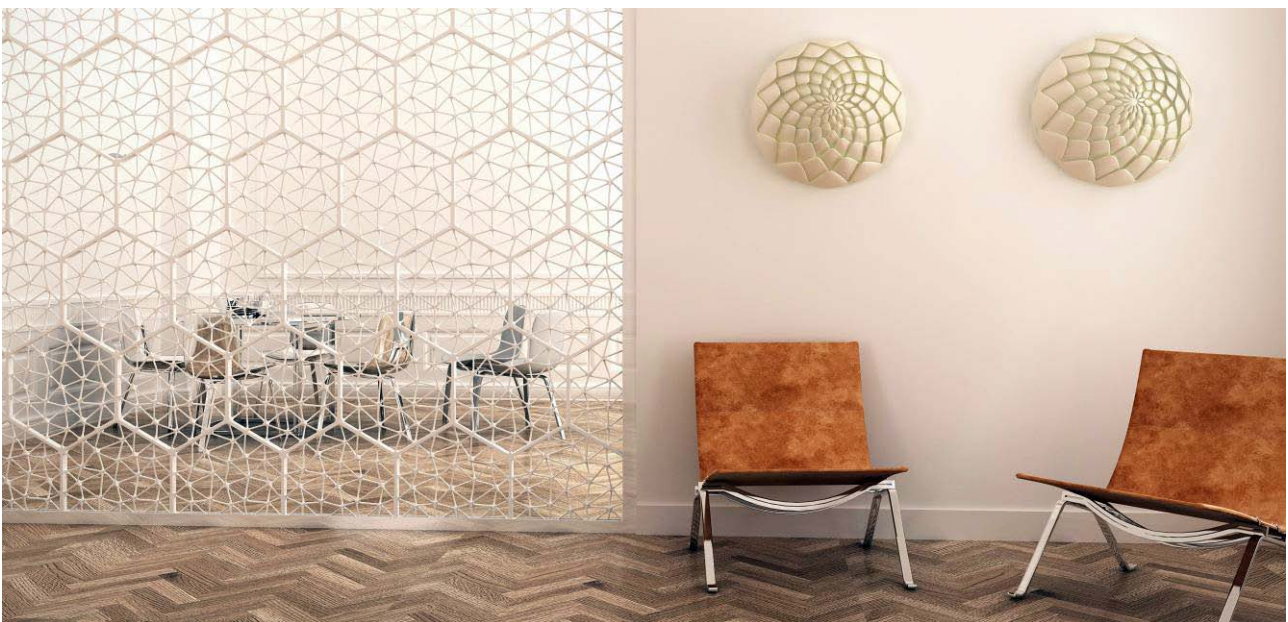

**Mounting system:** 2 tripod units connected with a screw that holds the panels together. A little round cap is provided to cover the screw (see below).

## About Freedom Of Creation - [www.freedomofcreation.com](http://www.freedomofcreation.com)

Freedom Of Creation believes in a future where data is the design product, and where products are distributed in the same way images and music travel through the internet today. FOC visions a future where storage is virtual, and the materials used for creating tangible products can be recycled and reused for any future creation people's hearts desire. FOC's work has something revolutionary, its products and services are part of a new movement that is changing the world. The journey of FOC started in 2000 with creating products for interior design. The company has come a long way and is now spreading the Freedom Of Creation message to a vast selection of clients in all areas of product development all around the globe.
